## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 & 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Rustum et al. “High-performance liquid chromatographic determination of 5-azacytidine in plasma,” Journal of Chromatography, 421, (1987), 387-391 (herein referred to as “Rustum”).

Rustum teaches a method for quantifying 5-zacytidine in plasma comprising mixing plasma with acetonitrile and zinc sulfate; separating the mixture by centrifugation; storing the separated mixture at a temperature less than or equal to about room temperature for at least about 3 hours; measuring the amount of 5-azacytidine using HPLC. See subheadings Procedure and Stability of 5-azacytidine in plasma.

### ***Allowable Subject Matter***

3. Claims 3-6 are allowed.

4. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach evaporating the removed acetonitrile layer to yield or further quantify 5-azacytidine.
